

The first trampoline park in the world that accepts crypto

6. August 2020 – Did you know that Slovenia is the global leader in the number of physical locations that accept payments with cryptocurrencies? There are ‘crypto’ driving schools, real estate agents, agritourism, hotels, restaurants, cafes and shops cryptocurrencies are also accepted by Burger King Slovenija – the first physical location of this chain in the world that enables its customers to pay with crypto. This record is due to GoCrypto, a system that enables merchants to accept instant payments with cryptocurrencies and to receive settlements in their local currency. The number of locations with the GoCrypto system is steadily increasing: GoCrypto is currently available in 13 countries, namely ten in Europe and three in South America. The 1000th GoCrypto location in Slovenia is the first ‘crypto’ trampoline park in the world.

Slovenian innovation is marked by advanced technologies, which are often among the leaders in Europe and even the world. The BTC City shopping and business centre in Slovenia’s capital boasts WOOP! – combining fun, adrenaline and sports in one place. It consists of WOOP! Trampolin park, the largest of its kind in the country, and WOOP! Karting, one of the most modern karting tracks in Europe. Recently, WOOP! has officially become the 1000th location in Slovenia to also accept cryptocurrencies as payment. As a result, Slovenians now sport the first ‘crypto’ trampoline park in the world as well as one of the most modern karting tracks offering this payment option.

WOOP! Trampolin park offers more than 100 trampolines and extends on more than 3,500 m².

WOOP! Karting, which offers a nearly 300 m multi-storey track with ramps, numerous light and sound effects and state-of-the-art vehicles, ranks among the very top in Europe.

In WOOP! Trampoline park as well as at WOOP! Karting, the adventure does not start or end with the attractions, but with first-class user experience from entry to departure. It is enhanced by the latest technologies, also in the area of payments. With its next-generation experience, which also includes the latest payment solutions, the BTC City shopping and business centre is developing into a unique ecosystem – the first Bitcoin City™ in the world. Such technologies include GoCrypto, which allows visitors to pay with cryptocurrencies in a matter of seconds.
